

# Robots' Intellect 2020

## Freestyle

**Short description:** any robot or gadget is eligible to participate in this competition, regardless of the function they perform.

### **1. Team**

1. Team can't contain more than 5 people.
2. The number of robots presented by a team is unlimited.

### **2. Exhibition**

Every participant will receive a designated area where they should present their creation to visitors and demonstrate what it can do.

### **3. Presentation**

In the designated demonstration area participants will have a chair and a table. To make the presentation easier and more interesting for visitors and evaluators, it is advised to use visual presentation methods, like posters or a projector.

### **4. Evaluation**

The robot will be evaluated on a scale from 1 to 10 in the following categories:

- A. Idea
- B. Effort to create
- C. Innovation
- D. Presentation

The final scores equal the sum of the received points. The creation with the highest score wins.

### **E. Responsibility**

The organizers of the event are not responsible for the safety of participants' property during the exhibition. The devices must not endanger the health or lives of the surrounding people.

**The organizers retain the right to change or modify the rules, informing the participants of the changes accordingly.**
